

NAYAN SONUNE

Software Developer, Mechatronics & Digital Media Enthusiast

Pune, Maharashtra | +91 8888073626 | nayansonune5@gmail.com

linkedin.com/in/nayan-sonune/ | GitHub: github.com/nayansonune-36

PROFILE

First-year B.Tech Computer Science student with a CGPA of 8.3 and a strong foundation in C++ object-oriented programming, hardware integration, and digital media. Experienced in architecting software systems, designing mechatronics projects from scratch, and managing end-to-end video editing workflows. Passionate about automating systems, troubleshooting electronics, and blending technical problem-solving with creative visual storytelling.

EDUCATION

B.Tech, Computer Science and Engineering

2025-2029

Pimpri Chinchwad University (PCU), Pune

First Year CGPA: 8.3/10

Relevant coursework: Object-Oriented Programming (C++), Data Structures, Logic Building.

Higher Secondary (XII) and Secondary (X)

JC High School

Class XII: 85.60% | Class X: 80.80%

PROJECTS

Anxiety Prediction ML Model

Completed

Python, Machine Learning

- Developed an Anxiety Prediction Machine Learning model utilizing systematic data preprocessing techniques.
- Conducted model tuning and evaluation to optimize predictive performance.

Diabetes Prediction AI Model

Completed

Python, Machine Learning

- Cleaned and standardized an Excel dataset by converting data types and removing special characters.
- Implemented feature engineering to calculate BMI, encoded categorical variables, and handled missing values via median and mode imputation.
- Managed class imbalance using synthetic data generation techniques to achieve accurate model evaluation.

Arduino-Controlled Robotic Arm

Completed

C++, Arduino Nano, Servo Motors, Hardware Design

- Developed custom C++ code and complex wiring maps to coordinate a precise, multi-servo robotic arm utilizing an Arduino Nano and a joystick module.
- Designed a robust power supply configuration using buck converters, carefully routing the 7.4V battery to ensure its positive terminal was not connected directly to the Arduino board to prevent hardware damage.

Pocketflow

Ongoing

Tauri v2, Rust, React

- Building a cross-platform desktop application leveraging Tauri v2 for a lightweight footprint and efficient performance.
- Integrating a React frontend with a high-performance Rust backend to manage core application logic.

Digital Media Agency Setup & Operations

Ongoing

Video Production, Motion Graphics, Project Management

- Launched an agency targeting content creators, providing video editing, motion graphics, and visual effects services.
- Structured a digital workspace to manage lead tracking and implemented a systematic data management strategy for client outreach.

TECHNICAL SKILLS

Languages

C++ (Primary), Python, C#, C, Rust

Hardware & Electronics

Arduino (Nano), Microcontrollers, Circuit Troubleshooting, Power Configurations, Buck Converters

Web & Frameworks	Tauri v2, React	
Media Tools	Video Production, Motion Graphics, VFX Tools, Brand Identity Design	
Core Concepts	Machine Learning, Object-Oriented Design, Automated Systems, Data Management	
CERTIFICATIONS & COURSES		
16 Days Complete Python Programming		Completed
Udemy		
Unreal Engine Character Development & Combat Systems		Ongoing
EDUCBA		
ADDITIONAL INFORMATION		
Interests: Hiking and Trekking, Robotics, Science & History Communication, Visual Design
